## Who We Are

**MEDWOL SERVICES (OPC) PRIVATE LIMITED** (CIN: U74910BR2021OPC053285) is an industrial packaging manufacturer located on the Pune–Nasik Highway at **Chimbli Phata, Chakan**, in the heart of one of Maharashtra’s densest automotive and engineering clusters.

We design and supply **PP (polypropylene) RTP** packaging – including boxes, internal inserts, bins, and **FLC / FSC foldable containers**. Our role is to help OEMs, tier suppliers, and FMCG plants protect parts, stabilise line feeding, and reduce packaging waste.

## Our Mission

To build **cost-effective, repeatable industrial packaging** around our customers’ real constraints: part weight and nesting, line-side handling, storage footprint, and total cost over the program life – not only the lowest quote on paper.

## Customer-First Philosophy

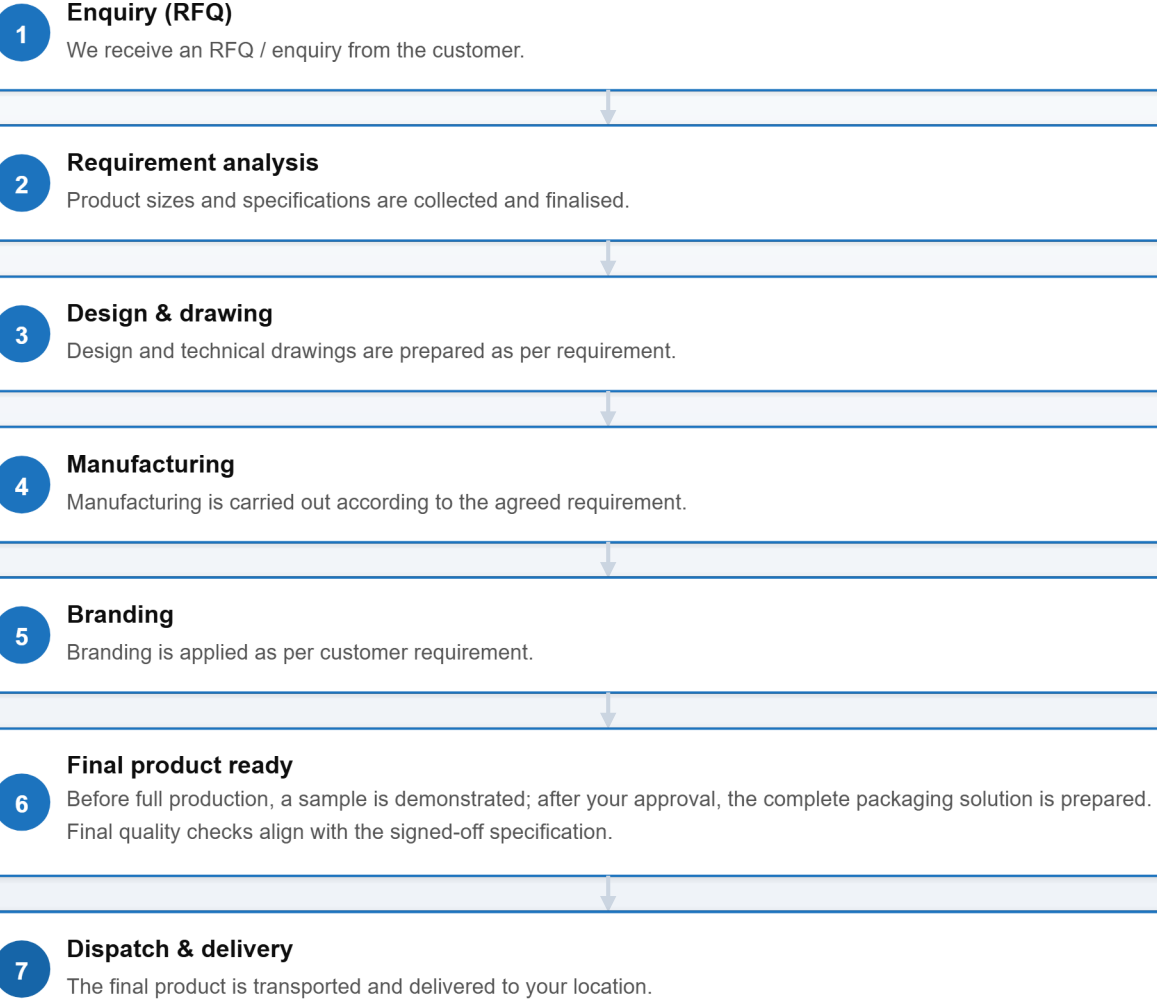

Your priorities shape our process: we listen first, clarify expectations, and keep communication simple from enquiry to delivery. Whether you need samples, design tweaks, or a fast turnaround, our team stays accessible so you always know the status – and get packaging that fits how your plant actually works.

## From enquiry to delivery – one clear path

Manufacturing in Chakan, coordinated logistics, and accountability for what we supply across our Pan-India network – so your team spends less time chasing packaging and more time on production.

### Process flow – enquiry to delivery

### Key benefits of PP boxes

- Strong, moisture-resistant PP suited to factory and warehouse conditions
- Lightweight for easier handling without giving up stiffness where it matters
- Custom sizes, colours, and printing aligned to your line and branding
- Designed for multiple use cycles where your programme supports RTP assets
- Rounded edges for safer line-side handling
- PP (type 5) is widely recycled where local collection exists

#### Design & trial

We suggest material options, testing paths, and a clear trial run before you scale.

#### Production

Chakan-based manufacturing with consistency and precise QC.

#### Dispatch & Pan-India

Scheduled dispatch and delivery aligned to your plant location and timelines.

#### ITEM #1

### PP Insert – Vertical Divider

Multi-slot vertical partition for component separation inside PP boxes and totes.

#### ITEM #2

### PP Insert – L-Shape Partition

L-shaped divider layout for securing parts at angles; fits standard RTP boxes.

#### ITEM #3

### PP Partition Frame

Rigid frame partition for heavy-duty part segregation; custom grid layout.

#### ITEM #4

### PP Corrugated Box Set

RTP PP corrugated boxes with inserts – ready for line-side feeding.

#### ITEM #5

### PP Corrugated Box – Open Top

Solid-wall PP corrugated box for general industrial parts storage and transit.

#### ITEM #6

### Plastic Crate – Solid Wall

Injection-moulded solid-wall crate; stackable, easy-grip handles.

#### ITEM #7

##### **PP Grid Insert / Partition**

Grid-style PP insert for multi-cell part separation inside crates and boxes.

#### ITEM #8

##### **Plastic Crate & Bin Set**

Matching crate and bin pair for nested storage; different depth options.

#### ITEM #9

##### **Industrial Crate – Stackable**

Heavy-duty stackable crates for warehouse racking and line-side buffers.

#### ITEM #10

##### **PP Insert – Grid Divider**

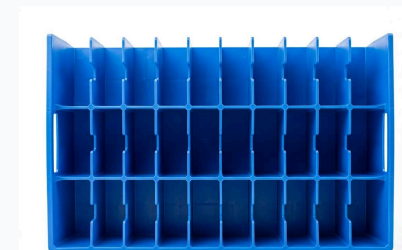

Grid-pattern PP partition for multi-compartment part protection.

#### ITEM #11

##### **Euro-Style Plastic Crate**

Euro-footprint industrial crate with lid compatibility; racking-ready.

#### ITEM #12

##### **PP Multi-Compartment Insert**

Multi-cell insert for small-part segregation; CNC or die-cut options.

## ITEM #13

### PP Corrugated Box – Standard

Lightweight PP corrugated box for RTP and one-way applications.

## ITEM #14

### Plastic Crate – Warehouse Stack

Industrial plastic crates stacked for high-density warehouse storage.

## ITEM #15

### PP Corrugated Box – Bulk Stack

PP corrugated boxes in bulk; consistent dimensions for pallet loading.

## ITEM #16

### PP Insert – Fitted in Box

Custom PP insert seated inside corrugated box for transit protection.

## ITEM #17

### PP Grid Partition

Interlocking PP grid partition for bottle, tube, or cylindrical part packing.

## ITEM #18

### FLC – Foldable Large Container

Collapsible large container with drop doors; saves return freight cube.

#### ITEM #19

### Plastic Pallets – Stackable

Heavy-duty plastic pallets; export-friendly, fumigation-free, WMS-compatible.

#### ITEM #20

### Plastic Pallet – Flat Deck

Flat-deck plastic pallet for uniform load distribution and automation lines.

#### ITEM #21

### FLC – Foldable Container (Collapsed)

Foldable container in collapsed state; minimal footprint for empty return.

#### ITEM #22

### FLC – Foldable Container (Side View)

Side profile of foldable container showing latch and hinge mechanism.

#### ITEM #23

### Green Plastic Crate – Solid

Colour-coded solid plastic crate for FMCG and dairy applications.

#### ITEM #24

### Green Storage Container

Deep storage container with carry handle; suited to plant consumables.

## ITEM #25

### PP Corrugated Sheets – Multi-Colour

Raw PP corrugated sheets in various colours; cut-to-size for custom packaging.

## ITEM #26

### Multi-Colour Plastic Bins

Small plastic bins in assorted colours for line-side sorting and kitting.

## ITEM #27

### PP Corrugated Box – With Lid

Enclosed PP corrugated box with matching lid for dust-free transit.

## ITEM #28

### Green Ventilated Crate

Perforated/ventilated crate for airflow-sensitive products; agri and FMCG use.

## ITEM #29

### Black Solid Wall Bin

Dark-colour solid bin for ESD-sensitive or UV-shielded part storage.

## Need a drawing match or trial batch?

Share your part sizes & volumes – we will come back with material options, a trial path, and indicative timelines.
